PROFILE

Outside of pursuing a new career in full stack development I fly airplanes, I am a mom to a wild toddler, we have 3 Australian shepherds and I have type 1 diabetes. From managing diabetes to flying airplanes I have developed a diverse range of skills to keep up with my crazy life. I have learned to multi-task, prioritize and manage my time. I also have developed a great deal of patience negotiating with an independent toddler and strengthened my communication skills teaching Chinese students how to fly airplanes.
